

Animal cells

License
available

- ✦ Primary stem cells or spontaneously **immortalized**
- ✦ **Fast** population doubling time

Patent
granted

Differentiation

- ✦ Lowering process' **costs**
- ✦ Triggering differentiation through **temperature** increase

3D-bioprinting

- ✦ Structured meat cuts with animal **muscle** and **fat** tissue
- ✦ **Biomedical** applications

CULTURED MEAT

Obtained through cell culture

Requires little space

Implies several advantages

ON EARTH FIRST

Good for the environment

Ethical for animals

Food security & safety

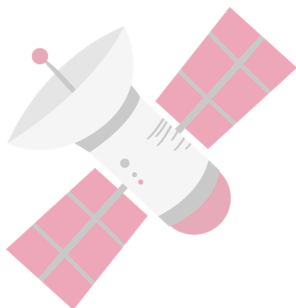

Raised \$3 billion

SOON IN SPACE

Familiar protein source

Psychological wellbeing

Long-term missions

IN CLOSED LOOP

Microalgae

Bioreactors

3D-bioprinting
