

Master in Business Management New Space Economy

II EDITION / A.Y. 2026-2027

BBS
MULTIPLYING OPPORTUNITIES

WHY THIS MASTER

INTERNATIONAL AND HIGH-TECH ENVIRONMENT

Experience a dynamic, international learning environment and gain insights into the rapidly evolving New Space Economy, including aerospace, satellite services, defense, and space data applications.

INDUSTRY CONNECTIONS AND PRACTICAL EXPERIENCE

Engage with leading companies, real projects, and hands-on activities to develop professional readiness and make an immediate impact in the field.

STRATEGIC AND OPERATIONAL SKILLS

Acquire managerial and technical skills to navigate complex business models, supply chains, and innovation processes in a technologically advanced sector.

CAREER OPPORTUNITIES IN A GROWING SECTOR

Position yourself for in-demand roles such as Business Analyst, Business Developer, Innovation Manager and other strategic functions.

«If you are driven by the ambition to operate at the frontier where business meets space innovation, the Master in Business Management – New Space Economy offers a unique gateway. It enables talented graduates to build strategic, technical and managerial capabilities that are increasingly sought after by companies leading this fast-growing sector.»

Angelo Manaresi
Director of Studies

*For classes 2023/24

CONNECTION WITH PRACTICE

Company visits and direct interactions with businesses provide students with unique opportunities to connect theory with practice. By engaging with industry leaders, exploring real operational challenges, and observing business processes firsthand, participants gain insights into current trends and sector dynamics, while also building a valuable professional network that supports their career development and enhances their readiness to take on managerial roles in a competitive business environment.
